DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on February 3, 2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent 6,472,090 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

2. Claims 1 and 5-19 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Independent claim 1 is directed to a method of operating a solid polymer fuel cell by reactant starving at least a portion of one of the electrodes when a temperature parameter is below a predetermined threshold value. U.S. Patents 6,472,090 and 6,096,448, the closest prior art, are concerned with reactant starving solid polymer fuel cells. However, these references do not expressly teach starving at least a portion of one of the electrodes when a monitored temperature parameter is below a predetermined threshold value, as recited in claim 1. Applicant has made statements of common ownership in accordance with MPEP §706.02(I), thereby disqualifying these references as prior art in a §103 rejection. Accordingly, the instant claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
